“

Our Promise

As a manufacturer & supplier we are determined to build on our established reputation as one of the industry leaders for customer care and quality products. We will continue to grow by exceeding our customers' expectations at every opportunity and further establish ourselves as a reliable partner for the future.

**Peter Doherty, Managing Director,
Garage Door Systems Limited**

”

At Garage Door Systems we know that our reputation is built upon the trust we inspire in every customer.

We want you to choose a Garage Door Systems garage door because you have the confidence in us as a company to know that:

- The products we make are well designed, built to last and are a pleasure to use every day. ✓
- All the garage doors we make come with our satisfaction promise and carry the performance and safety assurance of a CE mark. ✓
- Every door is made to order and made to measure for the ideal fit. ✓

We've been making garage doors since 1994 and our reputation is built on the half a million + of our garage doors and openers that have become part of homes throughout the UK & Ireland.

Quality, safety and security are held as our most important values.

It's essential that your new garage door is made to last, operates safely and provides a good level of security. Garage Door Systems' Design Engineers have created garage doors that lead the industry for their use of high grade materials and design features that ensure operation is not only safe but easy and reliable, day-in, day-out.

Quality extends to the service we provide to support our products and the team at Garage Door Systems is committed to making sure every contact is handled with courtesy and professionalism. Comprehensive warranties add the final seal to our service promise - see page 31 for full details.

Raising Standards
Safety Assured

Choosing your new garage door

We know that you don't buy a garage door every day and may only buy one or two in a lifetime! Before you dive in, why not take a moment to read our quick guide to choosing your new garage door.

Style?

First stop is, of course, the design of the door. You're spoilt for choice by DuraTherm with a range of designs that are equally at home in a contemporary or traditional setting.

Performance?

DuraTherm Sectional garage doors only offer one level of performance - the best! Brilliant energy saving insulation and all-round weather seals keep the elements at bay.

Finish & Colour?

The combinations of finishes, textures and colours available as standard for DuraTherm is extensive. Choice is made limitless by the further option of any RAL or BS custom colour you want!

Automation?

... Garage Door Systems is partnered with the world's No.1 garage door automation specialist - LiftMaster™. State of the art systems allow operation by transmitter, wall pad or smart phone.

Windows?

Plenty to choose from to personalise the look and performance of your door. Windows on our DuraTherm sectional doors add light and extra style.

Safety Matters - we CE mark

Safety is always first on our list. All products' are independently tested and certified to comply with the highest safety requirements of the European Safety Norm EN 13241-1.

Security built-in

Your garage is often the place where you store high value items or it may lead into your house. Every door has security designed and built-in proven for its ability to deter and keep out would be intruders. We also have a 'Secured by Design' Police Preferred Specification option - see DuraTherm Sentinel sectional garage doors on page 8.

What about size?

Every door is made to order and available in both standard and made to measure sizes, so you can be sure of an ideal fit for your garage.

Great to come home to!

Sectional garage doors are widely regarded as the perfect solution for your garage opening; they are extremely secure, reliable and also offer the highest levels of insulation and draught resistance. The smooth vertical operation of our sectional doors, combined with colours, styles and automation options will ensure you find the perfect design for your home.

DuraTherm panels

U Value: $0.55\text{Wm}^2\text{K}^*$

*Linear L, Linear M, Linear S & Georgian style panels. Coach House panel - U Value: $0.9\text{Wm}^2\text{K}$

What are U-Values?

They provide a measure of the insulating properties of a door panel - the lower the number, the better the performance.

(0.55 is good!)

Draught resistance & insulation

If your garage is integrated into your home it may have a bedroom above and will benefit from an insulated door to keep warmth inside and the elements at bay. A DuraTherm Sectional garage doors is the solution!

The Door Panel

Each door section is a sandwich construction of corrosion protected steel skins with an insulating core creating a very strong panel. Panels are 40mm thick with polyurethane insulation on all doors with the exception of the Coach House range that has 35mm thick panels with polystyrene insulation.

The steel is fully corrosion protected and has a durable top coat finish in either a factory finished polyester paint or foil laminate.

Full Perimeter Seals

Ensures the door is completely sealed when closed and provides optimum insulation & draught proofing. The floor must be level to help assist against water ingress. It is not possible to guarantee a complete seal.

"Designing out crime" with physical security products

At Garage Door Systems we take security seriously, and have always designed our products to be inherently secure. With Secured by Design approval you can have confidence that a Garage Door Systems' sectional door is a certified security product.

DuraTherm Sentinel has a strengthened design that is used in conjunction with a LiftMaster EVS electric opener to achieve the Secured by Design standard.

Security at the touch of a button - perfect!

The Secured by Design Police Preferred Specification standard to which our DuraTherm Sentinel sectional garage doors is tested and certified provides added peace of mind, knowing that your garage is as secure as it can be.

If you'd like to know more, visit the secured by design website here: www.securedbydesign.com/members/garage-door-systems-ltd

Ideal
Fit

Made to
Measure
Made to
Order

Contemporary or traditional, but always brilliant!

Sectional garage doors work like a dream and look fabulous, blending beautifully with the style of your home. Every door is made to measure for a perfect fit and is packed with features that make a real difference.

Security as standard

- Solid "wall", held in place by multiple rollers and full length steel guide tracks.
- Automated doors are held closed by positive force and includes evolution technology for secure operation.
- Manually operated doors have double locking points secured to heavy steel guides.
- DuraTherm Sentinel Doors with a LiftMaster opener are a 'Secured by Design' Police Preferred Specification option that has been tested to STS202 in accordance with burglary resistance required for construction products.

Secured by Design

Safety built-in

- CE marked for safety.
- Fingertrap prevention joints and hinges.
- Force sensing automation stops and reverses on detection of an obstruction.
- Anti-drop systems that halt the door if a lifting cable or spring fail.

Convenience - park right up!

- Fitted behind the garage opening, it adds up to 150mm (6") of drive through width.
- Vertical travel means the door has no "kick-out" and enables you to park right up to the garage door inside and out.
- Spring assisted opening means manual opening is smooth & easy.

Draught resistance & insulation

- Built to keep the weather out.
- 40mm (35mm on Coach House doors) panels provide excellent thermal performance.
- Weather seals to the floor, side and top helps keep out draughts and rain.

Smart automation

- Available with the world's number one remote control motor from LiftMaster™.
- LED courtesy light.
- Reliable and secure - the motor unit acts as a positive lock to hold the door closed.

Robust quality

- Built to last! High grade materials and durable finishes.
- Strong steel hinges and torsion springs.
- The thick insulated panels are strong and robust.

Stylish

- Available in a range of designs and a rainbow of colours.
- A striking selection of window options is available to bring light into your garage with obscure or clear glazing.

Linear Medium Black Woodgrain

The ultimate in safety and insulation

Interior & Exterior Pinch Resistant

The patented anti-pinch panel design protects fingers from becoming trapped in joints during operation.

Safety Sure

Roller Hinges

The side hinge rollers ensure the smooth running of the panels within the robust track.

Built to Last

Anti-Drop

All DuraTherm sectional garage doors are protected with an anti-drop technology that prevents the door from falling should you ever experience a spring or cable failure.

Safety Sure

Handle

A simple internal handle can be used to lift the door in manual mode.

Brilliant design

DuraTherm panels provide excellent insulation and are built to high standards in a range of standard finishes and textures that require minimal maintenance to retain their good looks. The images show the high grade surfaces of both factory finished polyester paint and foil laminates.

Colour coordinated frame

In most instances the frame is fitted behind the garage opening and is not visible.

When your door is fitted within the opening or where some of the frame is partially exposed, a colour matched frame is the perfect option for a fully coordinated look.

The frame can be colour matched to your chosen door colour (yes, even on custom painted doors).

(RAL 9005)

*As with all smooth face doors, darker colours are especially prone to showing imperfections or 'waves' across the surface - therefore we are unable to offer custom painted black on any of our smooth garage doors.

Colours shown are for guide purposes only and are limited by the printing process.
Always request to see a finish sample for confirmation of colour.

Finished Frame Option

The frame can be colour matched to your chosen door colour (yes, even on custom painted doors). A colour matched frame is perfect for when your door is fitted within the opening or where some of the frame is partially exposed.

More choices!

Handle Options

If you choose a manually operated door, a choice of handle styles is available.

Let the light in!

Add a touch of individual style & elegance with our glazing options. We offer the widest choice of window options with no extra lead time enabling you to create a bespoke look that lends itself perfectly to your home. Assembled with Toughened Safety Glass (Glass ABS 6206: 1981), our obscure windows allow light to enter your garage without compromising security.

Add visual interest to windows with a variety of colour-matched, easy-to-snap-in Decra Trim™ inserts. Glazing is dimpled opaque glass to allow light into your garage without comprising security.

Power up with the world's No.1!

Two mini transmitters & *wall control as standard (*excludes LM55 EVS)

Why leave the comfort and safety of your car when you can open your garage door at the press of a button, and be home and dry.

Garage Door Systems' doors are powered by LiftMaster™, the world's No.1 manufacturer of garage door openers.

Garage Door Systems trusts LiftMaster™ - **safety, security and rock-solid reliability.**

Liftmaster is the most **SECURE** lifetime home automation product in the world.

Over 20 years Garage Doors Systems has installed 100,000+ LiftMaster™ openers and models are available to suit every door size.

LiftMaster

LiftMaster® MAKING LIFE EASIER

A great choice of accessories gives you extra control.

Smart phone control too!

Optional non-contact photo eyes

Optional keypad control

Optional door monitor

Feature packed...

Our new LiftMaster™ EVS range are now **SMART** and **CONNECTED**, also partnered with Apple & Google platforms

myQ® works with Nest by Google -

LiftMaster's myQ® technology is the first garage door control system to be integrated with the Nest platform. The optional myQ® system allows you to set your Nest Learning Thermostat or Nest Cam using the myQ® app. You can also move seamlessly between apps allowing you to open or close your garage door from anywhere you can access the internet ...and watch it if you set up a Nest Cam.

Speed -

LiftMaster openers are quick! We have models offering up to a maximum travel speed of 200mm/sec.

Whisper Quiet -

The quiet and smooth operation provided by the belt drive system is second to none - try it out!

Sustainability -

The low standby power consumption corresponds to savings of up to £230 over the life of the opener compared to the majority of garage door openers that are installed around the world.

LED lighting -

Long lasting LEDs (up to 50,000 hours of service), have no warm up phase, so light is bright immediately and They are very energy efficient too.

Warranty Peace of mind

All Garage Door Systems Limited products' are independently tested and certified to comply with the highest safety requirements and performance characteristics or the European Safety Norms EN 13241-1. This is our commitment to providing products that are both safe and durable. The following covers the warranty periods.

DuraTherm Sectional Garage Doors

Garage Door Components	5 years	✓

Care and Maintenance

Every Garage Door Systems' garage door is provided with a Customer Care booklet that explains how to operate your door, how to look after the appearance of your door and the maintenance needed to keep your door in good working order and safe to use. The booklet also details your doors' warranty and the terms and conditions that apply for keeping the warranty valid.

Your door should be regularly serviced by a GDS trained garage door specialist. You can register your purchase on-line to receive a reminder of when your door is due for a service.

CE Marking

Raising Standards
Safety Assured

Why it matters - your safety.

It is against the law to install a power operated garage door in the UK without complying with The Machinery Directive. Why is it against the law? Because all garage doors must be manufactured to comply with European Safety Norms EN 13241-1

As a Door & Hardware Federation (DHF) Member, Garage Door Systems Limited is committed to your safety and all our garage doors and automation carry the CE mark. This shows they have been tested to EN 13241-1 and comply with the directives. The legislation is in place to ensure the safety of the products and that they meet the expected criteria for performance. If a garage door or automation does not carry the CE mark it does not meet the legislation and should not be purchased.
